## APJ ABDUL KALAM TECHNOLOGICAL UNIVERSITY

SECOND SEMESTER B.TECH DEGREE EXAMINATION, JULY 2017

**Course Code: CS100** 

**Course Name: COMPUTER PROGRAMMING (CS, IT)** 

Max. Marks: 100			Hours
		PART A	
		Answer all Questions.	
1		What is a variable? How are the variables declared in C?	(2)
2		How does $x++$ differ from $++x$ ? Explain with suitable examples.	(3)
3		Give the declaration of variable for storing the string "PROGRAMMING" in C.	(2)
4		What is the purpose of a switch statement?	(2)
5		Give the differences between while and do-while statement	(3)
6		What are formal arguments and actual arguments in a function?	(2)
7		What are function prototypes? Why do we use function prototypes?	(3)
8		How is an array name interpreted when it is passed to a function?	(2)
9		How do you declare a pointer variable? What is the significance of the datatype included in the declaration?	(3)
10		How do you interpret the following function declaration? int *p(char a[])	(2)
11		What is the purpose of typedef feature?	(2)
12		What is union? How does it differ from a structure?	(3)
13		What do you mean by opening of a file? How is this accomplished?	(3)
14		What are enumeration constants? How ordinal values are assigned to them?	(3)
15		Discuss the different parameters that are passed to main function as command	(3)
16		line arguments.  Explain register storage class with the help of an example.	(2)
		PART B	
		Answer any four questions. Each carries 8 marks.	
17	a)	Write a C program to test whether a given number is palindrome or not.	(5)
	b)	Discuss the differences between break and continue statements in C.	(3)
18	a)	Write a C program to find the largest and smallest numbers and their locations in an array of n numbers.	(5)
	b)	Explain recursion with the help of an example.	(3)
19	a)	Write a C program to sort a set of numbers using bubble sort.	(6)
	b)	Discuss any four bit level operators with suitable examples.	(2)
20	a)	Write a C program to find the transpose of a matrix.	(6)
	b)	How can you access structure members using a pointer to structure variable?	(2)
21	a)	Write a C program to concatenate two strings without using any standard library function.	(6)
	b)	What is the use of an indirection operator?	(2)

E3 B2E3004

b)

## **PART C**

## Answer any two questions. Each carries 14 marks.

22 Write a function to perform binary search on a set of sorted numbers. Write a (10) a) complete C program which accepts a sorted array of N numbers and invokes the function to check for the presence of a particular key element in the array. Compare formatted files and unformatted files b) (4) 23 Write a program to count the number of vowels, consonants, digits and special (10)characters in a text file. Discuss the different parameter passing techniques. b) (4) 24 A library database maintains following information about books:- book\_id, name, (10)author, no\_of\_copies. Write a program to sort the books based on the decreasing order of number of copies available. What are array of pointers? How do you declare an array of pointers? (4)
